

Manfrotto 521EX
Sony PMW EX1 remote control

Dear Team,

After SONY presented the new PMW-EX1 video camera, we are pleased to introduce the **Manfrotto 521EX** dedicated remote control.

The PMW-EX1 is a solid-state camcorder with no tape mechanism. Tape less acquisition appears to be the future and Sony is heading straight for it. We believe this is the perfect opportunity to expand our remote control offerings.

Manfrotto's 521EX features the usual range of professional features (zoom, zoom reverse control, zoom speed control) plus an innovative **fast zoom function**, which can be used without modifying the zoom speed control.

Enjoy this new product.

Regards,

Will Holowka
Product Manager
Bogen Imaging Inc.
