

FANTASY FX FAQs:

Q) *Is this safe to breath?*

A) Yes. This product was designed for the safe use with stage actors, children, animals and is odorless, non toxic, ozone safe, non irritating and very easy to use. It is safe to spray in the air and breathe for several hours while doing film scenes, photo shoots, stage work, outside and inside.

Q) *Will this product set off smoke alarms?*

A) Only if sprayed heavily or directly at the smoke alarm mechanism sensor.

Q) *How long will the haze last?*

A) 20-30 seconds of spray haze can last several hours in a still room. One canister can last all night for continuous haze to show off beams of light.

Q) *Is there a lot of smoke in the can?*

A) Enough for a continuous spray of 5 minutes. More spray is inside the Automatic Locking Can and comes out faster for a smokier effect.

Q) *Does the automatic locking tab (Auto Spray only) have to stay on?*

A) No. You can unlock it by prying up with the lid of the can.

Q) *How high does the spray go with the automatic locking tab?*

A) The Automatic Spray can will go over 6' straight up.

Q) *How can I get more smoke faster?*

A) Use the Automatic Spray can for faster output and larger coverage. Backlighting will also make the haze appear thicker.

Q) *What if I spray too close and get it on the equipment?*

A) Spraying close to items may leave a residue that is easy to clean with soap and water or baby wipes.
